LÜSCHER

JOH. SPRINZ GRÜNKRAUT (D) INSTALLED THE NEW XXL JETSCREEN! LT 55/32.

In the year 2000, Joh. Sprinz decided to invest in computer-to-screen technology to meet the increasing demand for high quality screen printing stencils. The decision fell on a JetScreen made by Lüscher, which at that time was still based on ink jet technology using hotmelt and representing the leading technology on the market. After 19 years of nearly trouble-free production with this system, Joh. Sprinz decided to acquire another Lüscher system. The Jet-Screen! LT 55/32 with a maximum frame format of 5500 x 3200 mm was recently installed and successfully put into operation at the Grünkraut plant.
