CYON ANALYSIS NOW ALSO AVAILABLE AS A STAND-ALONE SOLUTION

Immediate use for production optimization possible

In helioscope 05/2022, under the headline “CYON Analysis digitizes bath guidance”, we presented the Analysis software as the first extension module for CYON. From now on, this module is also available as a stand-alone solution. CYON Analysis was developed as part of the database-based CYON solution (“Cylinder Online”) to simplify and transparently display the evaluation of bath analyses and to automatically generate optimal correction recommendations. As a stand-alone solution, the relevant functions can now also be used for installations outside the AutoCON lines or for manual installations.

CYON Analysis is available as a stand-alone solution fully configured on a Mini PC. All manual installations can be created on this PC and the time-consuming and possibly error-prone manual calculations that were common up to now are no longer necessary. This way, even the stand-alone user can make optimal use of the full intelligence of the CYON Analysis software.

With CYON Analysis as a stand-alone solution, the electrolyte parameters can be managed and optimized in a similarly convenient and reliable way as with the CYON overall solution.

Of course, the bath samples can also be sent to the K.Walter laboratory in the stand-alone setup and analyzed there. The laboratory then sends the results to the analysis user by e-mail.

Monitor, keyboard and mouse are not included in the scope of delivery. This has the advantage that our customers can procure these components individually according to their requirements or use existing accessories. The decisive factor is that the CYON Analysis software is already preconfigured on the mini PC. Thus, this stand-alone solution can be used immediately for production optimization.

For details and further information please contact us at sales@kwalter.de.

CYON Analysis Dashboard and the Mini-PC

5 GOOD REASONS SPEAK FOR A SUBSCRIPTION

It's current: The newsletter provides the latest information on products and services of the Heliograph Holding companies.

It's comprehensive: You gain new insights into the current developments of the Heliograph Holding companies.

It's modern: Read all news in a clearly structured presentation with a modern look.

It's fast: You immediately get the content you want – without long downloads or tedious file-handling.

It's easy: Register simply and quickly.
